Education

Pontifícia Universidade Católica de São Paulo (PUC-SP)

2025 – 2028 (Expected)

- Bachelor of Science in Computer Science.

Experience

Microsoft

São Paulo, Brazil

Business Program Management Intern

September 2026 – Present

Supporting cross-functional business and technical initiatives through data analysis, program optimization, and AI-enabled solutions.

Up.p

São Paulo, Brazil

Product Management Intern

May 2026 – July 2026

As an intern at Up.p, a fintech leader in payroll-deducted financial products with over \$200 million in total volume, I contributed to the development and optimization of high-scale financial products.

- Led the prototyping and technical documentation for the new Employer Portal (Consignado CLT), translating complex business requirements into actionable product features for the development team.
- Streamlined internal workflows by automating key operational processes, resulting in improved team productivity and significant time savings.
- Managed performance optimizations and content updates for the company's main website using WordPress, ensuring high availability and consistent user engagement.
- Authored technical specifications and business requirements documentation, bridging the gap between leadership needs and engineering implementation.

Mapari

São Paulo, Brazil

Cofounder & Full Stack Developer

January 2024 – February 2026

I participated in the development of the Mapari application, focused on mapping the real-time movement of bars and events in the city of São Paulo.

- Developed an administrative control panel in Next.js, React, and TypeScript, optimized for the real-time visualization of data from over 80,000 daily requests.
- Executed the front-end implementation of a landing page based on the Figma design, using Next.js and TypeScript. The architecture was based on modular componentization and integrated market libraries to ensure clean, reusable, and high-performance code.
- Modeled and implemented a relational data architecture in PostgreSQL (Supabase), structuring relationships between multiple tables and applying industry normalization standards to ensure integrity and performance under millions of monthly requests.
- Built the backend layer through REST APIs in Next.js/TypeScript, leveraging the framework's native route structure for performant and type-safe endpoints.
- Implemented an infrastructure solution on AWS, using EC2 with cron jobs for scheduled tasks and S3 for scalable file storage.

Leadership & Volunteering

PUC-TECH

Academic League

Member

June 2025 – Present

- Led a team of four people in the development of a platform for identifying accidents on São Paulo state highways. Through machine learning, the project aimed to determine accident mitigation points based on official state data, gaining valuable insights into leadership, people management, and the project structure and lifecycle.
- Drove the successful and timely development of the platform by establishing organizational routines (meetings and checkpoints), managing deadlines and deliverables, and overseeing the fidelity of the design implementation.
- Collaborated on the organizing committee for PUC-SP's academic computer science week, assisting speakers and managing the event schedule.

INSTITUTO FEFIG

NGO

Volunteer

October 2025

- Operational support in fundraising for inter-state educational projects.

Technical Skills

Spoken Languages: Portuguese (Native), English (Fluent, C1/C2), Spanish (Intermediate).

Languages: TypeScript, JavaScript, Python, C, HTML/CSS.

Frameworks & Web: Next.js, React, TailwindCSS, FastAPI, REST APIs.

Data & AI: Pandas, Scikit-learn, Matplotlib, BeautifulSoup.

Automation & DevOps: Playwright, Docker, AWS (S3, EC2, RDS), Git/GitHub, Linux.

Databases: PostgreSQL, Supabase, Relational Modeling (SQL)

Design & Tools: Figma, Canva, Agile (Scrum).
